

نبذة عنا

Ahmed Diab Expertise & Specialization I am a Machine Learning & Deep Learning Engineer passionate about building intelligent models and innovative solutions that drive data-informed decisions. **Programming Skills** I know Python and C++ and JS deeply and use them to create high-performance, smart applications. **Data Structures & Algorithms** I have a strong understanding of data structures and algorithms, enabling me to craft scalable and efficient solutions to complex challenges. **Backend Development** I have learned backend development with ITI, focusing on Python, PostgreSQL, and Django. This experience has deepened my understanding of backend systems and their components. 🖥️ I am passionate about data and its power to drive insights. By combining my skills in backend development, machine learning, and deep learning, I aim to unlock the full potential of data and turn it into actionable intelligence. My goal is to create solutions that not only solve problems but also provide valuable insights that drive smarter decisions.
